Subject: Microsoft Settlement

Sir/Madam,

I am writing this to express my dissatisfaction with the Proposed Final Judgement to the Microsoft Antitrust case.

One of my main concerns with the Proposed Final Judgement (PFG) is that it supposedly makes Microsoft publish its secret APIs, but it defines "API" so narrowly that many important APIs are not covered.

If these APIs and terms are not clearly defined, it will leave many loopholes with which Microsoft will have ample opportunity to continue with its anti-competitive practices.

I urge the Department of Justice to take appropriate measures to make sure such injustice does not happen.

Best Regards,

-Roberto Mello
